

PSITTACUS

High Protein Maintenance Formula

Use

This product is intended for species that in wild consume a great amount of fruits and seeds with low-moderate fat content (*Amazona*, *Cacatua*, *Psittacula*, etc.).

Maintenance foods are formulated to feed pet birds and reproductive birds during non-reproductive periods. Their composition meets the nutritional requirements of birds at these times.

Directions for use

It is designed to constitute 100% of the parrot's diet in non-reproductive periods. However, if fresh fruit and vegetables are provided daily to lend variety to the diet, we recommend that Psittacus should constitute no less than 60% of the total intake.

No vitamin or mineral supplements should be given to parrots whose basic principal food is Psittacus.

It is appropriate to renew food and water daily.

Store in a cool dry place after opening inside a closed container.

Daily intake

Birds consumption varies between 5% and 8% of body weight. Medium-sized species (for example, Amazon parrots) consume around 20-35g per day.

Composition

Cereal grains, products and by-products of oil seeds and fruits, legume seeds, vegetable oils, products and by-products of cereal grains, fructose, dried brewer's yeast, minerals, inulin (0,05%)

Additives

Mixture of flavouring compounds (contains *Yucca schidigera* extract 0,015%); *Rosmarinus officinalis* extract / Sepiolite / Tocopherol-rich extracts of natural origin, palmitoyl-6-ascorbic acid / Compounds of trace elements (ferrous chelate, cupric chelate, manganese chelate, zinc chelate; calcium iodate anhydrous and hydroxy-analogue of selenomethionine) / Vitamins, pro-vitamins and chemically well-defined substances having similar effects (A, D3, E, C, K, B1, B2, B6, B12, Pantothenic acid, Niacin, Folic acid, Biotin, Choline chloride, B-carotene, Betaine anhydrous)

Analytical constituents

Moisture 7,0%, Crude protein 21,5%, Crude oils and fats 8,0%, Crude fibres 4,1%, Crude ash 5,5%

Package sizes

800 g / 12 kg bags
