

Crop Milk Replacer

Use

This product is particularly suitable for hand-rearing neonate granivorous and omnivorous nesting birds (Columbiformes, Psittaciformes, Passeriformes ...)

Daily consumption

As baby birds grow very rapidly, it is difficult to determine the ideal consumption. The capacity of the bird's crop will be the decisive factor. On average the birds consume from 7 to 10 ml of milk per serving, and per 100g of body weight. The number of doses per day will depend on the age, species and breeding protocol.

Recommendations

The crop milk should be prepared with hot water in sufficient quantity to achieve a creamy texture (about 25% concentration). The concentration should be continuously increased as of Day One. A very low-concentration milk should be provided at the first feed after hatching (approximately 5%); for each of the following feeds the concentration should gradually be increased until it reaches the recommended level. These recommendations are approximate, as each species requires its own specific hand-rearing protocol. With newborns it is important to supply the milk at a temperature as close as possible to the bird's body temperature (39°C), but without exceeding it, in order to avoid burning the crop.

Composition

Products and by-products of oil seeds and fruits / whole dried egg / vegetable oils / minerals.

Additives

Vitamins, pro-vitamins and chemically well-defined substances having similar effect: *E-672 Vitamin A: 3500 UI/kg; E-671 Vitamin D3: 1200 UI/kg; Vitamin E (α-tocopherolacetate): 300 mg/kg; Vitamin K3 (menadione sodium bisulphite): 34,6 mg/kg; Vitamin B1(thiamin hydrochloride): 26 mg/kg; Vitamin B2 (riboflavin): 21 mg/kg; Vitamin B6 (pyridoxal hydrochloride): 26 mg/kg; Vitamin B12 (cyanocobalamin): 105 µg/kg; Vitamin C (monophosphate of ascorbic acid): 200 mg/kg; Nicotinic acid: 131 mg/kg; Folic acid: 4.2 mg/kg; Biotin: 740 µg/kg; Choline Chloride: 1300 mg/kg*

Compounds of trace elements: *E-1 Iron (iron chelate of hydrated amino acids): 49 mg/kg; E-4 Copper (copper chelate of hydrated amino acids): 5 mg/kg; E-5 Manganese (manganese chelate of hydrated amino acids): 49 mg/kg; E-6 Zinc (zinc chelate of hydrated amino acids): 28 mg/kg; E-2 Iodine (anhydrous calcium iodate): 0.7 mg/kg; E-8 Selenium (sodium selenite): 0.150 mg/kg*

Antioxidants: *Etoxiquin: 100 mg/kg*

Anti-caking agents: *E-562 Sepiolite: 1.8 g/kg*

Flavouring compounds: *mixture of flavouring compounds (contains 0.015% yucca extract)*

Nutritional constituents

Moisture 5.0% Crude Protein 45.5%, Crude Fat 42.0%, Crude Fibres 0.5% Crude Ash 5.3%

Package Sizes

0.5 Kg bags
